PARTE

**"PERMACULTURE: A WAY TO RENOVATE TRADITIONAL
ENTREPRENEURSHIP"**

Verona (Garda) - Veneto Region -
Italy

From the 19th to the 23rd of
October 2020

PROJECT SUMMARY

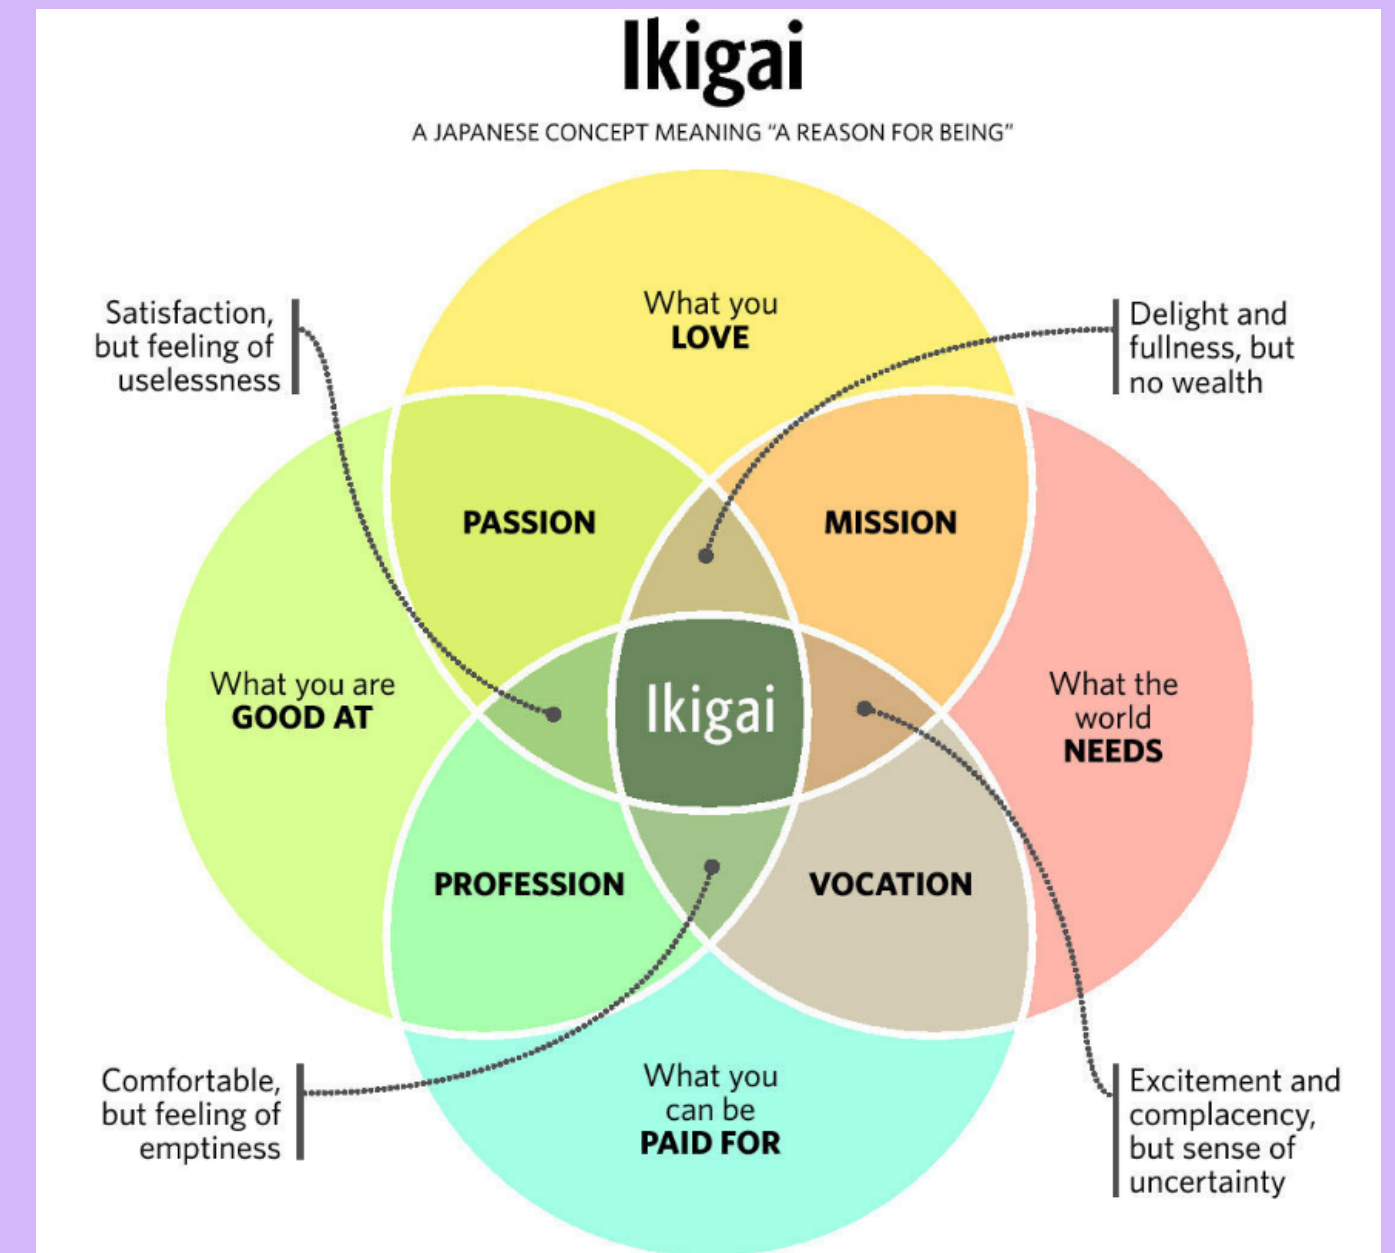

Oriel together with the partners initiates the project "Parte" which is based on Permaculture, Farming and Entrepreneurship. The title "A Way to renovate Traditional Entrepreneurship" has been chosen because we will combine the idea of growing creatively, socially and economically with the principles of Permaculture and its holistic approach, which put humanity not in the so-called top of the pyramid, but in the center of a circle, among all the other earthlings.

We'll meet local realities that managed to thrive even during Covid-19 time with little impact on their workflow and explore the concept of sustainable communities, that are growing around the globe scattered in their personality and possibilities, but united in a common feel: they feel that there is something missing in the urban metropolitan life.

Our aim is, with the help of an holistic approach, to foster a more socially inclusive idea of entrepreneurship.

The specific objectives of this project are:

- 1.To reach personal development which helps to understand ourselves and reflect on own behavior & behavior of others.
- 2.Challenge the perception of the structures within our society that undermine social inclusion or foster discrimination
- 3.To build a broader understanding of economic and entrepreneurial models and find a balance within them
- 4.To help future entrepreneurial ideas to find their "Ikigai"

PROJECT DATE

The participatory visit will be from the 19th until the 23rd of October 2020 (including travel days) in Verona, Italy. The main activities of the participatory are Permaculture, Farming and Sustainable youth-entrepreneurship which will take place from the 20th to 22nd of October 2020 in Villa Vaccari in Verona province near Garda lake.

It will bring together 6 persons (2 for each country) from 3 countries to learn things, tips and topics related to Permaculture and Farming. The participants will comprise of youth workers interested in those topics and want to increase their knowledge and skills through non-formal education methodologies.

The activity will comprise of various non-formal and informal learning methods based on activities in order to increase the awareness and different ways to experiment Permaculture. The methods to be implemented during the participatory visit include interactive team-building exercises, smallgroup discussions, live action role play, outdoor activities, demonstrations, field trips and expert input on the project topic. All the activities will be followed by the in-depth debriefing, allowing participants to analyze the knowledge, skills, and competences gained and ways of successfully using them in the future.
